

Esri Australia

Positive and Negative Indirect Effects of COVID-19 on the Environment

Internship available for Semester 1, 2021

As the market leader in the nation's \$2.1 billion GIS industry, Esri Australia uses the world's most advanced mapping and analytics technology to identify opportunities and solve challenges – from supporting the Australian bushfire crisis, to helping authorities understand COVID-19. Over the past four decades, we've have built a strong track record of achievement, earning the trust of the nation's most progressive government agencies and commercial enterprises.

We currently employ more than 200 of the country's brightest professionals from a range of disciplines including business analytics, cartography, environmental science, software development, information technology and surveying. Our company is headquartered in Brisbane with offices around the nation.

We are currently looking for an undergraduate student from ANU to undertake an internship in our Canberra office. You'll have the opportunity to contribute to real world projects while receiving mentoring from our experienced experts. You'll also be in a position to build your skills using the ArcGIS platform and have a front row seat to how GIS technology is making a difference in some of the country's most important initiatives.
